Below Expectation due to Seasonal Factor

WTON's 1H19 revenue and net profit only covered by 34% and 31% to our 2019 forecast due to the seasonal factor i.e.: lower infrastructure spending and 2019 Election effect. However, the company managed to improve its gross margin by 104 bps in 2Q19 to the level of 13.4% (vs 12.4% n 1Q19) which was mainly fuelled by a significant increases in its service's gross margin of 558 bps to 9.4% (vs 3.8% in 1Q19) thanks to its transformation as a one-stop solution of precast concrete business strategy. Recently, the share price increased by 54% YTD 2019 and still trading below its 3-years average fwd PER band of 15.47x, translated into an attractive valuation. Keep BUY rating on the counter.

1H19 Below expectation due seasonal factor and election effect

During the 1H19 period, WTON's revenue and net profit only inched up by 1.6% YoY and 3.8% YoY became to Rp 2.64 trillion (vs Rp 2.59 trillion in 1H18) and to Rp 167 billion (vs Rp 161 billion in 1H18), respectively, which was mainly due to the seasonal factor i.e.: 1) lower infrastructure spending and 2) 2019 presidential election process that has delayed new project contract tenders. As a result, the company's new contract declined by 13.2% YoY in 1H19 from Rp 3.13 trillion to Rp 2.72 trillion which was still dominated by infrastructure (61%) and energy (25%) sectors. In all, the company's revenue and net profit came below expectation which only covered by 34% and 31% to our 2019F of Rp 7.86 trillion in revenue and Rp 530 billion in net profit.

Improving quarterly profitability thanks to its one-stop solution strategy

On quarterly basis, WTON managed to improve its gross margin by 104 bps in 2Q19 to the level of 13.4% (vs 12.4% n 1Q19) which was mainly fuelled by a significant increases in its service's gross margin of 558 bps to 9.4% (vs 3.8% in 1Q19) thanks to its transformation as a one-stop solution of precast concrete business strategy (i.e.: precast sales and installation services). At bottom line, the company's net margin surged by 166 bps to the level of 7.1% in 2Q19 (vs 5.5% in 1Q19) on the back of the recovery of receivable's impairment loss of Rp 20.6 billion, mainly came from SoE construction company, i.e.: Hutama Karya dan Istaka Karya.

Gearing ratio improved to finance its aggressive capex

We note that the company's net debt to equity ratio has increased to 0.67x in 1H19 (vs 0.51x in 1H18) since the company obtained its total short term loan worth of Rp 2.5 trillion (+57% YoY) in order to finance its aggressive capex allocation this year of Rp 779 billion (+82% YoY) mainly for land expansion, increase capacity and ready mix development as well as to support the construction of its ongoing projects. This increasing gearing ratio was still reasonable and maintained at healthy level, in which, we forecast that the company's gearing ratio will be maintained at the level of 0.39x in 2019F-2020F.

Keep BUY rating with TP Rp 830/share

YTD 2019, the share price has increased by 54% which was still traded below its 3-years average fwd PER band of 14.95x, translated into an attractive valuation. We keep our BUY rating on the counter with 43% upside potential.

The Risk: 1) delays in infrastructure projects; 2) rising raw material prices; 3) weakening Rupiah currency; 3) delays in production capacity expansions; 4) contingencies from being labour-intensive; and 5) increasing competition.
